### DETAILED ACTION

Receipt and entry of Applicant's Preliminary Amendment dated February 03, 2005 is acknowledged.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

***Claims 1-4 are rejected under 35 U.S.C. 102 (a) as being anticipated by Pfendtner et al.***

***(Pfendtner) (Patent Number WO 03/027452 A1 or US Pat. No. 6,912,841).***

Regarding claim 1, Pfendtner discloses a system (Figure 1) for treating the exhaust gases (e.g. 51, 52) of a motor vehicle combustion engine (Figure 1), particularly a lean-burn diesel engine or petrol engine, comprising a burnt gas (e.g. 51, 52) exhaust circuit (Figure 1), of the

Art Unit: 3748

type in which the exhaust circuit (Figure 1) comprises a burnt gas (e.g. 51, 52) ionization system (e.g. 4, 30) and an ionized air injection system (e.g. 6, 50) upstream and/or downstream of the burnt gas (e.g. 51, 52) ionization system (e.g. 4, 30), which comprises means (e.g. 6, 30, 50) for ionizing the ambient air that convert a portion of the oxygen present in the ambient air to ozone, and of the type in which the air ionization means (e.g. 6, 30, 50) and the burnt gas (e.g. 51, 52) ionization system (e.g. 4, 30) each consist of at least one reactor (30) of the non-thermal plasma-generating discharge type, characterized in that the burnt gas (e.g. 51, 52) ionization system (e.g. 4, 30) comprises a plurality of reactors (20, 10) arranged in series which successively ionize the burnt gases (e.g. 51, 52) (e.g. See US Pat. No. 6,912,841; col. 1, lines 54-67; col. 2, lines 1-67)..

Regarding claim 2, Pfendtner further discloses that the various reactors are separate compartments of a single vessel (e.g. See US Pat. No. 6,912,841; col. 1, lines 54-67; col. 2, lines 1-67).

Regarding claim 3, Pfendtner further discloses that the exhaust circuit comprises a catalyst for treating nitrogen oxides, that is positioned downstream of the ionized air injection system (e.g. See US Pat. No. 6,912,841; col. 1, lines 54-67; col. 2, lines 1-67).

Regarding claim 4, Pfendtner further discloses that the various reactors are separate compartments of a single (e.g. See US Pat. No. 6,912,841; col. 1, lines 54-67; col. 2, lines 1-67).

### ***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of five patents:

Peugeot et al. (Pat. No. FR 2862340 A1), Caren et al. (Pat. No. 6264899), Cho et al. (Pat. No. 6959538), Bittenson et al. (Pat. No. 6030506), and Yokota et al. (Pat. No. JP4276167) all discloses an exhaust gas purification for use with an internal combustion engine.
